

ADM in the United States

Based in Illinois, ADM is an indispensable global agricultural supply chain manager and processor, a premier human and animal nutrition company, a trailblazer in groundbreaking solutions to support healthier living, a cutting-edge innovator in bio-based products, and a leader in business-driven efforts that support food security, a strong agricultural sector, resilient supply chains, and a vast and growing bioeconomy.

From our humble founding in Minnesota in 1902, today ADM partners with more than 56,000 American farmers, opening new markets for American agriculture and supporting our rural economies. With an integrated value chain spanning harvest to home, our 18,000 American colleagues purchase vast volumes of crops, utilize our unparalleled transportation and logistics network to move those crops from areas of supply to areas of demand, and wield a vast manufacturing footprint — including more than 150 facilities in the U.S. — to transform them into an unmatched array of innovative food, feed, fuel and consumer and industrial products.

Supporting Farmers, Communities and Customers

ADM is proud of its 120-year history as an American company, and committed to supporting a strong future for the farmers, industries and communities that we're part of.

We work with farmers to strengthen their businesses and legacies, including through our regenerative agriculture program, which helps support the soil, water and air that crops depend on.

We work with communities, supporting charitable efforts that support food security and health and well-being, including direct support for initiatives and education on nutritious diets and healthy eating.

We work with partners both public and private to support policies and investments to enhance American food security and ensure strong manufacturing and transportation industries that drive good jobs and economic growth.
